Sahra-Eye System Schema

Simple 3-step overview of how the smart vision system protects the city

SIMPLE OVERVIEW

STEP 1

What Goes In

The system gathers information from two simple sources:

STEP 2

What the AI Does

The AI automatically works in real-time behind the scenes:

STEP 3

What Happens Next

Operators in the control room see the outcome immediately:

- City Cameras Network feeds
- Plain text search via NLP
- Optional reference photo

- Finds missing people across cameras
- Flags medical falls & collapses instantly
- Blurs faces to keep everyone private

- Live target lock alert on screen
- Exact camera location highlighted
- Rapid dispatch for police & paramedics
